## NEWS RELEASE

### **Reward Introduces New 17” iForm® to Expand Insulating Concrete Form Product Line**

Omaha, Neb. (May 26<sup>th</sup>, 2009) – Beginning in June of 2009, the newly designed 17” iForm straight and 90-degree corner Insulating Concrete Form (ICF) will be available nationwide through Reward Wall Systems. Reward’s newest size of ICF, features a 12” concrete core for additional strength and durability needed when designing and constructing large commercial projects and deep foundations.

The 17” iForm product line, allows for the expansion of the available application uses of ICFs by allowing for taller walls and additional load bearing strength.

“The addition of the 17” iForm increases the construction options for our customers and their projects, while also maintaining the quality and the sustainable green properties our customers have come to expect from Reward’s products,” said Ed Storm, Reward Wall Systems’ President.

Available as both the straight and 90-degree extended corner iForm®, the 17” Straight is 16 inches high and covers 5.33 square feet of wall and the 17” iForm Corner will be an extended corner covering 7.33 square feet of wall and contain Reward Wall Systems award winning double “H” bridging corner bracket for the strongest corner in the ICF market.
