## **Reward Wall Systems Announces 2006 Project Awards**

Omaha, Neb., (March 27, 2007) -- Ed Storm, president and CEO of Reward Wall Systems, recently named the recipients of the company's 2006 Project Awards. The awards are presented to the distributors and contractors who used Reward's insulating concrete forms (ICFs) in construction projects ranging from residential single-family homes to large-scale commercial developments.

"We are grateful for the continued quantity of high-caliber projects that are produced by our outstanding customer base," Storm said. "We are impressed with the variety of projects we evaluate each year. One sector of the market that has seen a real increase in activity has been projects completed in the education sector. We are pleased to be able to recognize several of those outstanding projects this year."

Reward Wall Systems, the nation's leading manufacturer of ICFs, presented two Outstanding Education awards. One award was given to Construction Supply Centers—for the Timber Ridge Gymnasium in Winchester, Va. The project is a 28,000 square foot gymnasium in a private school for troubled youths and was the first self-performed job by Ricketts Construction.

Also receiving an Outstanding Education project award is Central Supply Company, which received the award for an off-campus housing project at the University of West Virginia in Morgantown. The project created 30 student-housing units.

Taking home the Outstanding Commercial Project award for 2006 was IMS Masonry for the Multiplex Theater in Ogden, Utah. This mammoth project used Reward ICFs to build both the perimeter and demising walls with minimal waste.

Cemstone Contractor Supply of Mendota Springs, Minn. took home the 2006 Outstanding Hospitality Project award for their work on the East Bay Suites in Grand Marais, Minn. This 28,000 square-foot "condotel" restoration project won an honorable mention in the NAHB Award of Excellence competition as well as a runner-up award in the Light Commercial category of the ICF Builder magazine's 2006 Builder Awards.

Reward selected three winners in the Outstanding Multi-Family category. They are: Central Supply Company for the Snowshoe Condo Project in Snowshoe, W. Va. The

three-unit condominium project was built into the side of the mountain and presented special logistical challenges that were particularly well-suited to ICF construction. Advanced Building Supply won an award for the scenic 6-unit, 14,000 square-foot Crestview Heights development in Missoula, Mont. The third winner in the Multi-Family category is the upscale, 9 unit-4 story Royal Oaks condominium development in Dubuque, Iowa.

The Outstanding Residential Project award went to DAK Construction for a single family, 9,409 square-foot, two-story home in Ponte Vedra, Fla.

The Rookie of the year award was given to Prairie Supply, Inc. of Bismarck, N.D. and the Top Producer for 2006 is Cemstone Contractor Supply of Mendota Heights, Minn.
