Reward Wall Systems Transfers Production to Diversified Plastic Corp.

Nixa, Mo., company's commitment to quality ensures customer satisfaction.

Omaha, Neb. (October 10, 2006) --Reward Wall Systems Inc., the nation's leading ICF (insulating concrete form) manufacturer is moving their Omaha production to Diversified Plastic Corporation (DPC) in Nixa, Mo.

The move, which began in August, will be complete in three months. The first shipment of ICFs from the Diversified plant was in September, according to Kevin Jones, Reward's vice president of manufacturing operations.

"We have very high expectations of the quality and service our plants provide. DCP has exceeded every one of our expectations. The people at Diversified don't just talk about quality, but have processes in place to ensure it. Our customers will be very pleased," Jones said.

Diversified Plastic Corporation has been in business since 1969 and has a long history of manufacturing the highest standards in quality, as demonstrated by their QS-9000 certification in 1998. Scott Schaefer, executive vice president/co-owner of DPC said, "We are very pleased and proud to have the opportunity to work with such a well-respected and recognized leader in the industry. They have developed the highest quality ICF product line."

The Nixa, Mo., plant will distribute Reward ICFs primarily in the central Midwest, and will be supplying Ledge, Taper Top and 45-degree corner forms nationwide, according to Jones. The Nixa plant joins six other Reward production facilities that are strategically located around the United States to reduce customers' shipping costs.
