## NEWS RELEASE

### **Reward becomes first ICF certified to the new ASTM E2634, *Standard Specification for Flat Wall Insulating Concrete Form (ICF) Systems***

Omaha, Neb. (July 20th, 2011) – Reward Wall Systems becomes the first insulated concrete form (ICF) to be officially certified to the new ASTM E2634 standard. This new standard will be referenced in the next 2012 IRC and IBC codes.

The new ASTM standard was created to deal with the varying quality of ICFs on the market by creating more consistency, acceptance, and credibility for the ICF market. Code officials and the design community will use the standard to ensure a minimum requirement is meant.

Kelvin Doerr, P.E., Reward's VP of Engineering who was on the task group to develop ASTM E2634 said, "After taking many years to finalize this standard, there is now a minimum benchmark to be part of our ICF industry. Reward has always been on the forefront of industry advancements, which is why we wanted to be first to comply with the new standard and to continually lead the ICF industry in innovation and market acceptance."

For more information on the new ASTM E2634 standard, Kelvin Doerr can be reached at 1-800-468-6344
